ReactJS, React Native, Redux, NodeJS, Golang, Ruby, Terraform, AWS, Docker, Jenkins, CircleCI, GitLab CI/CD, Grafana, Prometheus, Mixpanel, AppsFlyer, Google Analytics, Firebase, Jira.

EXPERIENCE

RBC Ventures, Ampli, Toronto - *Full Stack Software Developer*   **April 2018 - PRESENT**
- Lead software developer for numerous app features: designing, coordinating, and implementing the code, while communicating across teams in order to deliver the MVP most efficiently.
- Implemented the first analytics engine to be used across multiple ventures.
- Configured and deployed Ampli, alongside the DevOps and CloudOps teams, as the first Venture to migrate to a more hardened and security-backed AWS account.
- Worked with DevOps to decouple our servers into task workers and web servers in order to optimize performance and make autoscaling more cost efficient.

Symantec, Toronto - *Full Stack Software Developer*   **November 2017 - March 2019**
- Actively refactoring the UI of our internal network dashboard (React, Redux) and implementing the correlating endpoints within our various backend systems (Golang, Ruby).
- Optimized and added monitoring to our RESTful API's, daemon services, and AWS Kinesis Data Streams (Golang) on Symantec's VPN Platform.
- Set up various aspects of the infrastructure for our backend systems in AWS (Terraform) including:
    - Implementing a lambda function to automate a snapshot of our EBS volumes (Python).
    - Setting up a bastion host in order to safely ssh into instances.
    - Implementing an IAM role with tighter policies in order to restrict access to the Terraform user (CloudFormation).
- Developed, tested and implemented the frontend and backend work for the end-of-life of two products (Javascript, Ruby). Managed the rollout to a total of just under a hundred thousand users.

SurfEasy VPN, Toronto - *Frontend Developer*   **March 2017 - November 2017**
(Acquired by Symantec in November 2017)
- Implemented a pricing page with login, signup and payment processing forms (ReactJS, Recurly).
- Worked alongside designer and product manager to implement new pages on the marketing website, including: careers, about and partnerships pages (Vanilla JavaScript).

Canopy.co, Toronto - *Digital Strategist*   **June 2016 - February 2017**
- One of three team members in an early stage company, requiring the ability to wear many hats with a focus on user acquisition and retention. Implemented and ran social, email, partnership and A/B testing campaigns across multiple platforms while maintaining a catalog of over 50k products.
- 6 month growth: 498% increase in pageviews of editorial content, 330% increase in sessions via email, 166% increase in combined social followers, 1050% increase in sessions via Instagram.

EDUCATION

Humber, Toronto, 09/2015 - 02/2016
Web Design & Development

University of Ottawa, Ottawa, 09/2010 - 04/2014
